- Uses any RMM-4XXX data cartridge
- USB 2.0 high-speed data download
- Universal 9 Volt AC to DC power adapter included
- Front panel indicators
 - Power on
 - Data transfer activity
- Front panel power switch

Description

The DTU-4500S data transfer unit is a low-cost desktop unit used to download pre-recorded data from removable memory cartridges. Memory cartridges are available as RMM-4XXX-SS, removable RMM-4XXX memory modules. Data recorded using the nREC-4000S recorder downloads to a local PC or network drive using the USB 2.0 port on the DTU-4500S.

Applications

- Ground support
- Recorded data transfer
