

Removable Fibre Channel Storage Media Cartridge

Applications

- High-speed airborne recording
- Flight test industry

Features

- Media cartridge for use in TTC's MSR-200X-PS and RMSR-2002-PS airborne high-speed recorder products
- High-speed data recording
- Record capacity ranges from 128 to 256 GB (Higher capacities based on media availability)
- Support multiple secure erase algorithms with TTCWare Media Manager
- Ruggedized for airborne applications

Description

The MSC-XXXX-SS is a SATA-based media cartridge that is compatible with TTC's MSR and RMSR data recorders. The cartridges use ruggedized Commercial off the Shelf industrial temperature solid-state drives that are part of an airborne data collection and storage system from the AIM-2004 product line.

The MSC cartridges are designed to be removable so that cartridges can be moved from the MSR-200X-PS to the RMSR-2002-PS ground-based playback unit for data extraction, formatting, and secure erase operations.
